## **DCA HD-DVD Technology shown at DVD Forum General Meeting**

**Tokyo, Japan (February 27, 2004)** – During the DVD Forum General Meeting on February 26<sup>th</sup> and 27<sup>th</sup>, the Working Group 11 (WG11) hosted a workshop demonstrating the HD-DVD technology from five companies. DCA demonstrated its V8/HD-DVD system and displayed HD-DVD discs made with DCA Genesys, Pulstec demonstrated their prototype tester, Sanyo demonstrated their blue lasers, and NEC and Toshiba demonstrated HD DVD players. In addition to above items, HD-DVD discs made by Cinram, Memory Tech, Hitachi Maxell were displayed.

**Shown (from left to right): Nozomu Hayatsu, DCA Optical Disc Systems, Japan; Doug Carson, CEO, DCA, Inc.; Kiyohiko Mita, DCA Optical Disc Systems, Japan**

**About DCA, Inc.**

DCA, Inc., Doug Carson & Associates, (<http://www.dcainc.com>) is the industry's leading provider of world class signal processing technology. Since 1988, CD and DVD manufacturers world-wide have relied on DCA's pre-mastering, mastering and verification products. DCA's products being exhibited include DDP Archiver and DDP Toolkit tools, MIS (Mastering Interface System) V8 - supporting both CLV and CAV mastering, and Commander. DCA is also heavily involved in new format development in the optical disc industry such as HD-DVD through its Genesys signal processor.
